

Certificate

Muhammad Hassan Umar, born 13.06.2005

has successfully participated in a joint university – industry project called

SmartFactory@Industry

from Nov. 07, 2024 – Dec. 11, 2024

this academic co-creation project has been conducted at Daimler AG Sindelfingen
and was concluded with an academic colloquium

Project completion and colloquia presentation were evaluated
with an overall grade of 1,3

This certificate recognizes Md. Hassan Umar's outstanding contributions to the Waste reduction team, highlighting remarkable problem-solving skills and a commitment to excellence in vehicle development with a focus on production.

In the initial stages of developing the ideas to tackle the issue, Md. Hassan Umar identified and addressed numerous technical challenges crucial for achieving practical and Concrete Solution. Recognizing that existing technical solutions fell short of meeting production cycle times or required refinements, he skillfully navigated through complex issues to enhance and optimize these aspects.

The culmination of Md. Hassan Umar's efforts resulted in technically advanced solutions that not only met desired result but also gave implementable ideas based on the initial situation provided. These solutions aligned seamlessly with the luxury ambitions of the organization, showcasing his prowess in incorporating technical innovations into the production process.

The found solutions stand as a testament to Md. Hassan Umar technical acumen, demonstrating his ability to navigate complexities and ensure efficiency and reliability in series production. His technical accomplishments have significantly contributed to the success of the project.

Beyond technical prowess, Md. Hassan Umar distinguished himself by developing a non-biased approach to problem-solving, advocating for fairness in decision-making processes. Actively seeking innovative ideas together with his teammates, he significantly contributed to a culture of continuous improvement.

In addition to these achievements, Md. Hassan Umar exhibited notable creativity, a profound understanding of series production, and exceptional problem-solving skills. His strong sense of teamwork and collaboration further enriched the team's environment.

During the final pitch to a high-ranked jury consisting of members of KIT, Md. Hassan Umar demonstrated exceptional commitment that surpassed expectations. He showcased excellent presentation and problem-solving skills, effectively communicated within the team, and gained competencies in analytical thinking.
